EXPERIENCE

American Express

2024 – Present

Software Engineer – Banking & Servicing Platform

- Full-stack engineer on the Internal Servicing Platform (ISP), delivering 8+ Banking features end-to-end — from requirements through production — across cross-functional teams
- Primary contributor to Business Savings Account onboarding, owning ~42% of initiative scope (10 of 24 workstreams) covering transactions, holds, restrictions, limits, and rewards; enabled a net-new Banking Line of Business
- Architected a unified observability framework (ISP Logger + ELF) across multiple Banking journeys; built analytics dashboards tracking load times, journey completion, and feature usage through 2 major releases
- Built Account Restrictions module from the ground up integrating 4 REST APIs — shipped with 100% test pass rate and zero post-release defects, enabling fraud, compliance, and operations teams to manage restrictions in-platform
- Delivered Seamless Switch across 4 journeys with product eligibility validation, account token migration, and journey refresh logic; standardized behavior across unsupported product scenarios platform-wide
- Founded PKL Agents, a centralized AI enablement platform using GitHub Copilot Skills, accelerating engineer onboarding and standardizing development practices across the engineering org
- Owned platform health governance across 2 Banking services; maintained A-grade ratings across security, reliability, maintainability, and vulnerability metrics
- Mentored 3 engineers to independent feature ownership; established recurring Design Review sessions that improved architecture governance across the team

Deloitte

Nov 2020 – June 2022

Full Stack Developer

Lake Mary, FL

- Developed 21 single-page applications using Vue.js and TypeScript, modernizing a .NET legacy web app used by thousands of users filing worker's compensation claims in Pennsylvania
- Built RESTful APIs using ASP.NET connecting Vue.js frontend to SQL backend, enabling cross-browser and mobile access for clients
- Served as primary developer for bug triaging across 5 sprint cycles and 50 applications, using Chrome DevTools and Vue.js DevTools

Propulsion Technologies International

July 2018 – June 2020

Digital Technology Analyst

Miramar, FL

- Led company-wide digital transformation — implemented machine connectivity, data visualization, and analytics pipelines that reduced data access time from 2 hours to 5 minutes using Power BI

SKILLS

Languages: TypeScript, JavaScript, Java, Solidity

Frameworks / Libraries: React.js, React Native (Expo), Next.js, Vue.js, Node.js, ASP.NET

Tools: GitHub, Supabase, PostgreSQL, Tailwind CSS, Power BI, Hardhat, Mocha, Chrome DevTools

EDUCATION

Florida International University

Miami, FL
